## ABSTRACT

The abstract should summarize the content of the paper. The abstract should not exceed 250 words and should not include equations or references. If you use abbreviations in the paper, e.g., CIS, use the full meaning of the abbreviation in the abstract, e.g., Computer Information Systems. The manuscript should be printable on 8.5" x 11" paper. All tables, figures, etc. must be in black and white only since the Journal does not print in color. Remove all HTML and XML formatting. The electronic readability of your submitted copy is of critical importance. We may edit your final, submitted copy to fit the journal's needs.

## 3. HEADINGS

Major headings are to be column centered, numbered, and in a capitalized **bold** font, as shown in this document. Manually insert numbers; do NOT use the Bullets and Numbering feature of Word. Do NOT indent the first line of the paragraph immediately following the heading, but DO indent all subsequent paragraphs by .2".

### 3.1 First Level Subheadings

First Level Subheadings are to be numbered, left justified, bold font, and title case. No blank line is to appear between the sub-heading and the text. Do NOT indent the paragraph immediately following the subheadings, but DO indent all subsequent paragraphs by .2".

### 3.2 References

List all references at the end of the paper in alphabetical order by primary author last name. When citing references in the text, type the last name and date. The citation should appear in parentheses (Dumdum and Tastle, 1998). Groups of citations should appear in a single set of parentheses separated by semi-colons and ordered alphabetically by author last name (Ashby, 1956; Harris, 1995). If two or more papers are cited that were written by the same author, separate the years with commas (Harris, 1995, 1996). List all last names of references with three or fewer authors. If there are more than three authors, list the last name of the first author, followed by et al. for the citation (Ngai et al., 2005), but list all authors in the reference section. No spaces should appear between references. Format is APA and should utilize the hanging indent format with .13" indent.

### 3.3 Figures and Tables

Figures and tables should be original and placed in the manuscript on the page where they are referenced or on the beginning of the following page. Titles should be centered, **bold** type, and below the

figure or table in a text box without borders or fills. Figures and tables that will not fit in one column should span the entire page and should be located at the top or bottom of the page. Section breaks should not be used when adding tables or figures. To achieve this, format figures and tables with text wrapping and position the item where you desire.
