

Title of the project

Outline: Brief summary of the intellectual merits, the project plan, and the broader impact.

Motivation and Intellectual Merit: Describe the research background and intellectual merit of the project.

Research Plan The proposed plan for the research project you are describing. Here is some math:

$$R_{\mu\nu} - \frac{1}{2}Rg_{\mu\nu} = 8\pi GT_{\mu\nu}.$$

This is a note to myself about something to do later. And here is an example citation [1]. Let's cite another paper because we're good scientists [2].

Broader Impacts This is the section where you describe broader impacts.
